The Mythic Platform

Agentless breach intelligence, observed from the attacker's side.

FOR SECURITY, THIRD-PARTY RISK, AUDIT, AND DISCLOSURE TEAMS

01 THE INVERSION

Every detection product you run lives inside your perimeter, watching for signs of an intruder, and can be blinded by the very intruder it watches for. Mythic inverts the model: it monitors the adversary's own infrastructure at global scale and reports which organizations are in live contact with it.

02 THE METHOD

Reverse Attack Surface Analysis works from the attacker inward. Mythic tracks threat actors as they register domains, stand up command-and-control servers, and stage campaigns. When victim networks begin communicating with that infrastructure, Mythic observes the exchange directly: not an anomaly score, an observed, timestamped event.

03 THE EVIDENCE

Mythic's models rank confirmed breaches by material impact: what is actually being taken, and from whom. Each record carries the empirical detail of the observed exchange, so security, risk, audit, and disclosure teams act on the incidents that matter, with the evidence attached.

FRAMEWORKS ATT&CK TA0042–TA0011 · NIST CSF 2.0 · ISO 27001 A.5.7

WHAT YOU GET

- Nothing to install: no agents, no hardware, no access to any environment
- Confirmed breaches backed by observed exchanges, not correlations
- Materiality-ranked intelligence, from your own networks to your vendors'

EVERY CONFIRMED BREACH CARRIES

01	Date and time of breach
02	Victim and destination IPs
03	Port and protocol
04	Data exfiltrated by the implant
05	Machine, user, OS, file paths
06	The implant responsible

> Nothing to install, no hardware, no access to any environment required. Mythic observes from the adversary's side of the exchange.

ABOUT VIGILOCITY

Vigilocity builds technology for identifying and eliminating threat actor infrastructure, drawing on decades of counterintelligence operations inside adversary networks.

THE METHOD

Reverse Attack Surface Analysis works from the attacker inward: tracking adversary infrastructure as it is built, then observing the victim networks that begin talking to it.

WHO RELIES ON MYTHIC

Global financial institutions, Fortune 100 brands, Big Four advisory firms, and national governments. Our clients do not appear on this page. That is part of the service.
